Amendments To The Specification

Please amend the paragraph beginning on page 10, line 15 as follows:

FIG. 38 is a perspective view of a further tactic contemplated herein, for delivering projectile systems in accordance herewith, to a target within a building; [[and]]

Please amend the paragraph beginning on page 10, line 18 as follows:

FIG. 39 is a perspective view of a further tactic contemplated herein, for delivering projectile systems and inhibiting a target, for example, by impacting an object, such as a ceiling, near the target[[.]];

Please add the following new paragraphs following the paragraph beginning on page 10, line 18:

FIG. 40 is a cross-sectional view of a launch device useable in combination with a projectile for delivering an inhibiting substance to a living target, wherein the launch device assumes the form of a PR24 police baton thus allowing dual use of the launch device, i.e., as a launch device and as a PR24 police baton;

FIG. 41 depicts a projectile system for use in delivering a substance to a target that includes a plurality of projectiles and modified flashlight launch device capable of launching one or more of the plurality of projectiles; and

FIG. 42 depicts a projectile system for use in delivering a substance to a target that includes an air pistol launch device capable of launching one or more of the plurality of projectiles depicted in FIG. 1.
